Daily Conversation

A dialogue between mother and daughter about examination:

Mother: Sarah, Come here.

Daughter: Yes mom.

Mother: I got the progress report of your exam.

Daughter: Sorry mom, I didn't do well this time.

Mother: I know. You have failed in science subjects.

Daughter: Mom, I'm very weak in Science subjects. But I solved the biology and math papers with good marks.

Mother: What's the point of getting good marks in only 2 subjects? You have to do well in all your subjects. Even your biology and math papers are not satisfactory and your marks are not more than sixty percent.

Daughter: My teachers are not supportive of me.

Mother: Don't blame them. Teachers will treat all students equally. You are responsible for your progress. Your report shows that you are very lazy and careless. What is the reason?

Daughter: Mom actually, I get bored when I pick up my books especially science books.

Mother: You disappointed me.

Daughter: I am sorry, I promise that I will work hard for the next exam.

Mother: Okay good. Work hard.

Maxine: Hi Steve, how are you?

Steve: I'm fine Maxine. What about you?

Maxine: Yeah, I'm fine too. Do you know anything about climate change?

Steve: Yes, what do you want to know about that?

Maxine: First, what is climate change?

Steve: Climate change is a change in the average weather patterns, such as warming, cooling, temperature, and precipitation in a particular area.

Maxine: Is it bad for us?

Steve: Yeah, sometimes it's fundamental and has a dangerous effect on nature.

Maxine: What is the biggest cause of climate change?

Steve: Pollution is the biggest reason. Air, soil, and water are polluted every day due to various types of pollution and this changes the weather and climate in the long run. Global warming is also a very big reason behind this.

Maxine: Is there any possibility to prevent the worst effect of climate change?

Steve: Yes, it is possible. But the whole world should work together for that. More attention should be paid to tree cultivation. It will create better air quality. Then we need to stop polluting our environment, especially air pollution. And the growing population requires more energy and food, which is why we hunt animals, cut down trees, and build buildings, which threaten the environment. We need to stop such activities. This is how you can get rid of this problem.

Maxine: Okay. Now I understood. Thanks Steve for helping me learn about this important topic.

Steve: You're welcome Maxine. Nice talking to you, take care.

Conversation between Teacher and Student on School Dress

Smith: Good morning, Sir.

Teacher: Good morning, Smith. Why did you come to school wearing your normal shirt and pant? Where is your uniform?

Smith: Sir, my uniform is in the laundry, but I can't miss my classes, that's why I came without a uniform.

Teacher: Good, you can't miss your classes. One thing I tell you Smith that the school uniform is not simply a show but it is a symbol of identity and unity with the school. Do you know all these?

Smith: No sir. Would you please explain this, sir?

Teacher: Oh yes, when you use your school dress, it appears that you belong to the school, you are proud of the school.

Smith: Yes sir. I can understand now.

Teacher: Good. There are a few problems that can happen to you when you are going back to your home or coming to school without a uniform.

Smith: What types of problems, sir?

Teacher: If you get lost, people won't recognize you as a student at our school outside. It will be helpful to identify you.

Smith: Really sir! I never thought that before.

Teacher: Do you now understand the importance of wearing a school uniform?

Smith: Yes sir.

Teacher: Are you going to forget your school dress in the future?

Smith: No sir, I won't forget. I will wear that every day.

Teacher: That's good. Take your seat.

Smith: Thank you, sir.
