Honourable chair person, respected teachers and my dear friends.
Today I am going to talk on the topic of Teacher's role in student's life. I hope, you will listen my speech carefully.

As it said that the after parents, Teacher is a second Guru in students' life. Teacher plays an important role in students' life. He

•

is the person who mould the student's personality. He is not only a teacher for student but also friend, philosopher and guide. While teaching his subject he plays a role of facilitator. He is always motivating students for learning new things in their life. Students always like to imitate their teacher. He becomes a role model for them. Teacher designs curriculum or syllabus of different subjects which students enable to gain subjects knowledge. So, we can say that Teacher not only teaches his subject but he plays different role

in students' life, like actor, mentor leader etc. Now a days, means in today's technical world teacher has changed his teaching style. He has changed his chalk and talk of traditional method to techno savvy teacher. He is good planner, counsellor and assessor.
