A1 Non-Verbal to Verbal

Read the following tree diagram and prepare a short paragraph on The Sentences.

(Justify your answer with examples of each type and sub-type of sentence.)

Ans:

Types of Sentences

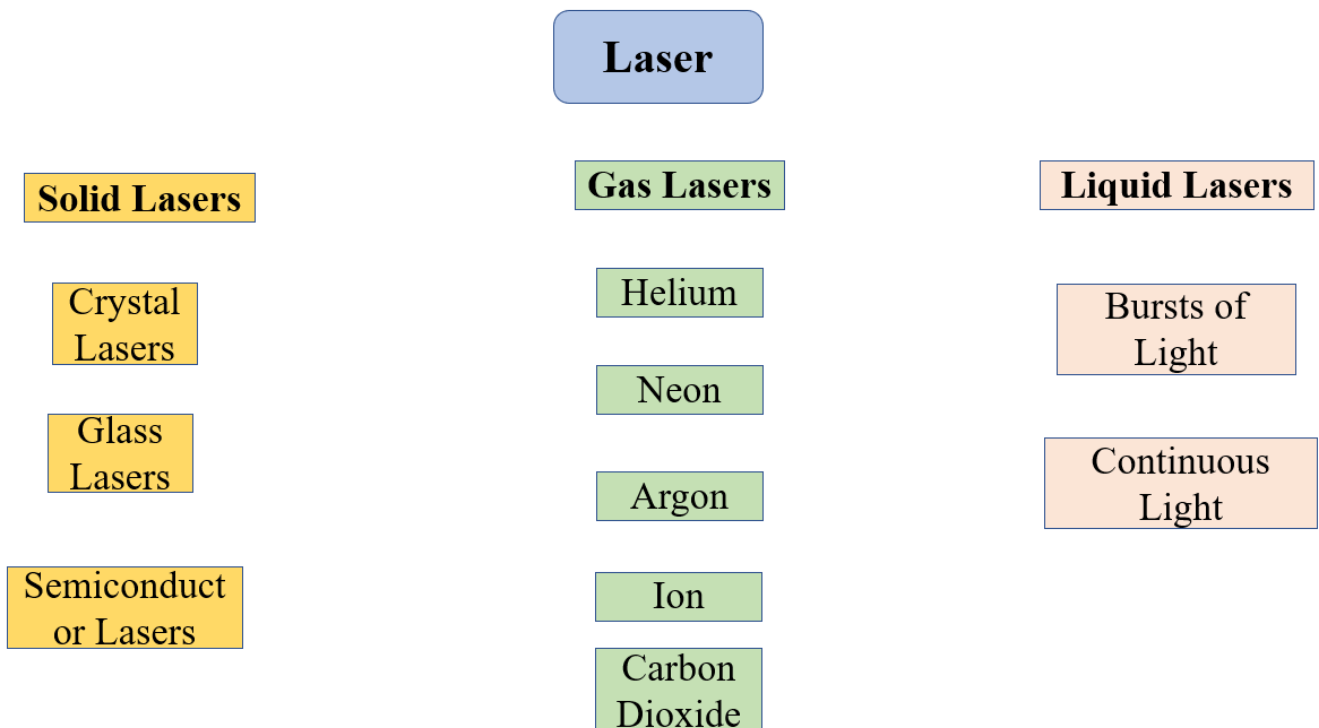

Sentence is a group of word which have a meaning. There are four main types of sentences. These are Assertive, Imperative, Interrogative & Exclamatory sentence. **Assertive sentence** is also called simple sentence. Its word order is subject + **Verb** + **Object**. Eg. We can speak English fluently. Assertive sentence may be affirmative or negative. **Imperative sentence** begins with verb. For example, 'Give me your pen.' Imperative sentence have meaning of order, command or request. **Interrogative sentence** is a question. There are two types of question. W-h question and yes no type question. For example, 1. Where do you live? 2. Will you help me? Forth type of sentence that is **Exclamatory Sentence**. End of the sentence there is exclamatory marks(!). It shows strong feelings or emotions. For example: How beautiful place it is!

A2 Verbal to Non-Verbal

Draw a tree diagram that contains the main points and important supporting details from the following text about the 'Laser'.

Laser is a device that amplifies light. A laser produces a thin intensive beam of light that can burn a hole in a diamond or carry the signals of different television pictures as the same time. **There are three major kinds** of lasers based on their light amplifying substance- **solid lasers, gas lasers and liquid lasers**. **Solid** lasers use a crystal, a glass or a semiconductor as the light amplifying substance. **Crystal lasers, Glass lasers, and Semiconductor lasers are different types of solid** lasers. **Gas lasers** have a gas or a mixture of gases as their light-amplifying substance. **Helium, neon, argon, ion and carbon dioxide lasers are the most widely used types of Gas lasers**. **Liquid lasers** produce both bursts of light and continuous light. **Liquid lasers that produce bursts of light use a flash tube as their source of power. Those that produce continuous light get their power from a gas laser.**

A2 Verbal to Non-Verbal

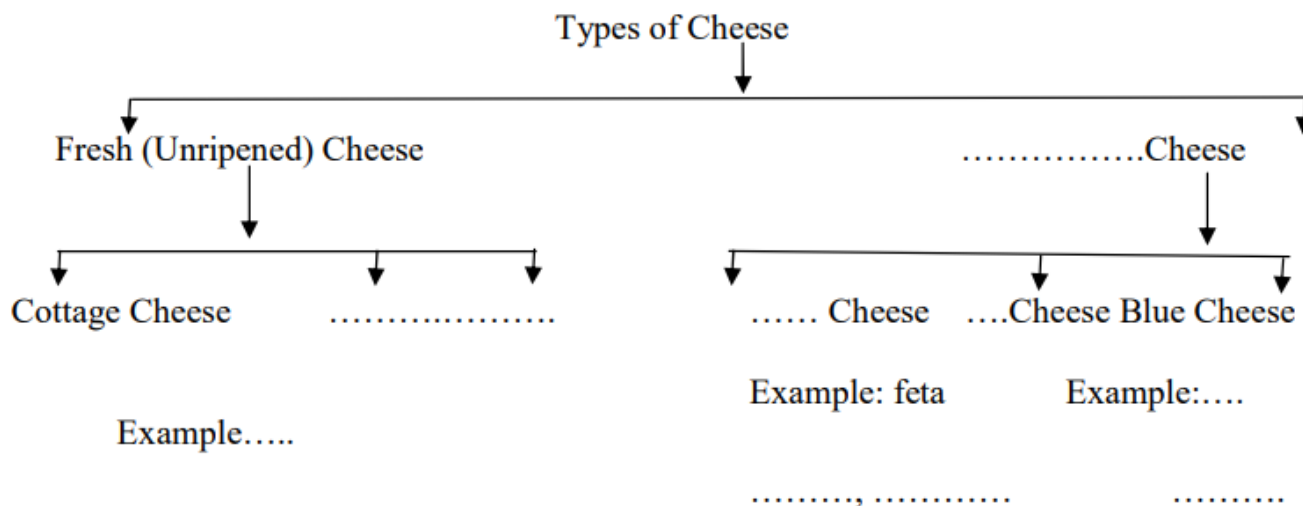

Read the following extract carefully and prepare a Tree Diagram on Types of Cheese.

SAY CHEESE!

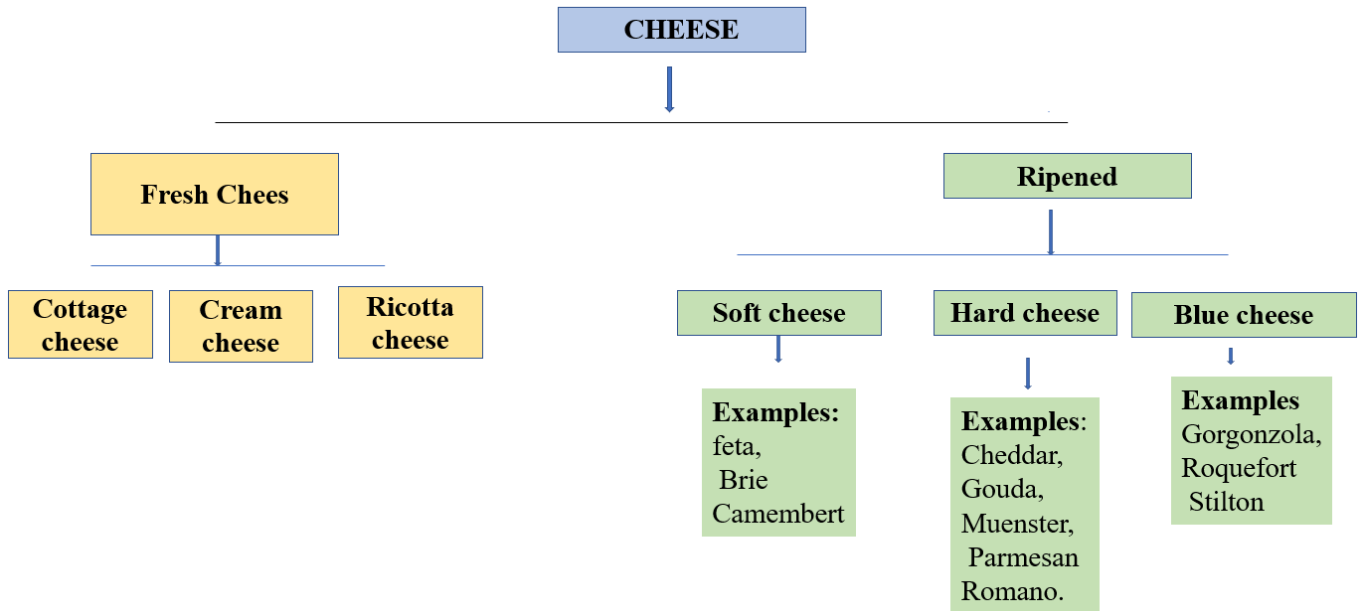

Once upon a time, an Arab trader was on a long journey through the desert. He has taken some milk under the saddle in an animal stomach. After some hours, the milk changed into solid white lumps. The animal stomach developed a coagulating enzyme called Rennet which eventually turned the milk into a cheese-like matter, and accidentally cheese was discovered. However, some claim that Sumerians knew how to make cheese from ancient times.

Everybody seems to like cheese and with the number of varieties available, there is certainly something to appeal to everyone. All cheese is made from animal milk (either cow's, goat's or sheep's). The cheeses are mainly **classified as fresh or ripened**. **The Fresh** (unripened) cheeses include **Cottage cheese, Cream cheese and Ricotta cheese**. **Ripened cheese** is classified into three sub-types- **Soft cheese, Hard cheese, and Blue cheese** according to the texture. Soft cheeses such as feta, Brie and Camembert, have been ripened for a short time. **Hard cheeses** are ripened for various lengths of time and range from semi hard to hard. They include Cheddar, Gouda, Muenster, Parmesan and Romano. **Blue cheeses** are ripened by green moulds and include Gorgonzola, Roquefort and Stilton. You can take the help of the following clues.

You can take the help of the following clues.
