Tree Plantation

Honorable principal, dear teachers, and my dear friends today we are proud to celebrate the Van Mahotsav (tree Plantation) festival with an aim of conserving trees.

Van Mahotsav is an annual tree-planting festival in India celebrated in the first week of July. This movement was initiated in the year 1950 by India's Union Minister of Agriculture, Kulapati Dr K.M. Munshi. It is expected that every citizen of India has to plant a sapling in the Van Mahotsav week. It helps spread awareness amongst people about the harm caused by cutting down trees. People celebrate Van Mahotsav by planting trees or saplings in homes, offices, schools, colleges, etc.

Tree plantation drive is our duty. Trees provide alternative fuel options, food for cattle, help in soil conservation and prevent floods. They are the best way to prevent global warming and reduce pollution.

Trees are therefore our natural wealth and they need to be protected. The government should strictly apply the laws of forest conservation. Trees are being cut by a civilian for getting land to construct houses, to make furniture, etc., Govt. should make a check to it and see that a tree being planted for every tree cut. Those who are found engaged in the activity of deforestation should be captivated under National Security Law. If both Govt authorities

and civilians become aware of forest protection then only we can conserve them __ Thank You.

You intend to take part in the interschool elocution contest. One of the topics therein is 'Role of Youth in Active Politics'. Prepare a speech in about 100 words.

Ans:

'Role of Youth in Active Politics'

Honourable chair person, respected teachers, and my dear friends. Today I am going to express my views on the topic of 'Role of Youth in Active Politics'.

Unfortunately, the youth of today have been given such a bad name when it is only a minority of people who are creating social disruption. Most youthful people are motivated and long to do well in everything they do, which means they could be a very important aspect in politics.

Firstly, young people have different perspectives and a host of different ideas. By allowing them to voice their opinion we could be opening and moving the political world forward.

This is not only good for society, but necessary for society.

If the young did not engage with politics, even if it is through pressure groups, there would be many issues with our political establishments in trying to keep policy fair and sustainable for future generations. For example, equal rights for women required many young women to engage with the issue at hand. Why? Because they had strong feelings for the issue at hand, and that is something that countries should work to increase — interest and opinion on political matters. I hope today's youth will divert toward politics with good intention and he will save our Indian politics from bad politicians.

Thank very much.

A healthy Good morning!

To all the respected teachers, Students, and my colleagues. Today, I want to discuss a very important topic "save water". As we all know that water is our lifeline. It is a basic need for humans, plants and also microorganisms.

Without water, we can't imagine our life. The presence of water on earth is only reason for life is possible here. The three fourth part of earth is covered with water but only 4% of water can be used for drinking. We should try to conserve the water.

A parent must aware their children about the need of water conservation. The water conservation technique should be promoted by T.V and news bulletin. So, at last, I want to conclude my speech with a humble request to save water! save life!.
